

UPDATE to the ESMF

April 2021

This document is to provide the update for the Kosovo ARDP ESMF, since the last update of January 2017, in the section of:

1. List of registered the Plant Protection Products - Page 40-50;
2. Status of the primary and secondary Kosovo legislation, related to the agri-environmental and social activities of KARDP - Page 79-105;
3. List of the activities that require a Municipal Environmental Permit according to the 'Administrative Instruction (MESP)-No.01/2017 for the Release of Municipal Environmental Permit' Page - 115

1. Plant Production Products authorized for use in Kosovo

The Law Plant Protection Products approved on Nov 2008 regulates of placement in the market and control of active substances of products for plant protection, authorization, circulation, use, residue in plants and plant products, record keeping of natural and legal persons included for placement in the market and use of products for plant protection, technical requests for equipment used for application and their elements, responsibilities of authority competent for implementation of this law and its monitoring.

This law regulates classification, covering and labelling of products for plant protection, in the accordance with directives of European Commission. Kosovo only registers pesticides permitted in at least one other EU country and containing only active ingredients approved by EU and contained on a continuously-updated EU list. This law also regulates the residue of active substances of products for plant protection, waste of their packages and the method of emission in the environment.

Updated Register list of Plant Production Products authorized for use in Kosovo of date 11.11.2020

Data: 11.11.2020

Regjistri i Produkteve për Mbrojtjen e Bimëve të regjistruara në MBPZHR, që lejohen të importohen, vendosen në treg dhe përdoren në Republikën e Kosovës
Register of plant protection products registered in MAFRD allowed to be imported, placed on the market and used in the Republic of Kosovo

GHS08 – Health hazard

GHS09v- Environmental hazard

Pesticide Management and Safeguards

WHO Toxicity Classes¹

The 'WHO Recommended Classification of Pesticides by Hazard' was approved by the 28th World Health Assembly in 1975 and the classification has gained wide acceptance. Guidelines were first issued in 1978, and have been revised and reissued at two-to-three-year intervals. In December 2002 the United Nations Committee on Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labeling of Chemicals (UNCETDG/GHS) approved a document called 'The Globally Harmonized System of Classification and Labeling of Chemicals' with the intent to provide a globally-harmonized system to address classification of chemicals, labels, and safety data sheets.

¹ World Health Organization (WHO) - The WHO Recommended Classification of Pesticides by Hazard and Guidelines to Classification 2019.

Classification and labeling based on acute toxicity form a part of the GHS, but there are some differences between the GHS and the WHO traditional classification of pesticides by hazard. WHO is in the process of adjusting the Pesticide Classification to conform to the GHS. WHO bases its classification on the “acute risk to health”- the risk of single or multiple exposures over a relatively short period of time - that might be encountered accidentally by any person handling the product in accordance with the directions for handling by the manufacturer or in accordance with the rules laid down for storage and transportation by competent international bodies.

Prior Informed Consent (PIC) Procedure

The Rotterdam Convention was adopted on 10 September 1998 by a Conference of Plenipotentiaries in Rotterdam, the Netherlands. The Convention entered into force on 24 February 2004. The United Nations Environment Program (UNEP) and the UN’s Food and Agriculture Organization (FAO) had jointly implemented the original PIC procedure, which operated until the adoption of the Rotterdam Convention (officially known as the Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade) (see <http://www.pic.int>, or <https://www.echa.europa.eu/home>). Although Kosovo did not sign yet the Convention, it follows its rules and requirements.

The objectives of the Convention are: To promote shared responsibility and cooperative efforts among Parties in the international trade of certain hazardous chemicals in order to protect human health and the environment from potential harm; and To contribute to the environmentally sound use of those hazardous chemicals, by facilitating information exchange about their characteristics, by providing for a national decision-making process on their import and export, and by disseminating these decisions to Parties.

The Convention creates legally binding obligations for the implementation of the PIC procedure. It covers pesticides and industrial chemicals that have been banned or severely restricted for health or environmental reasons by Parties and which Parties have notified for inclusion in the PIC procedure. One notification from each of two specified regions triggers consideration of the addition of a chemical to Annex III of the Convention. Severely hazardous pesticide formulations that present a hazard under conditions of use in developing countries or countries with economies in transition may also be nominated for inclusion in Annex III (see: <http://www.pic.int/Portals/5/download.aspx?d=UNEP-FAO-RC-CONVTEXT-2015.English.pdf>)

Kosovo, implements the requirements of the Rotterdam Convention through the ‘Administrative Instruction (MESP)-No.23/2015 for Export, Import and Transit of Certain Hazardous Chemicals’, PIC-Procedure, although it is not yet part of the convention. These active ingredients/chemicals and formulations will be excluded for use by KARDP.

Pesticide registration in the European Union

The European Community (EC) has established a harmonized legal framework for the regulation of pesticides in all member countries of the EC. The Commission of the European Communities, in collaboration with member countries of the EC, is responsible for the registration of pesticide *active ingredients* (also referred to as *active substances*) for use in all EC member countries. Individual member countries, called Member States, are responsible for the registration in their country of specific pesticide *products* containing active ingredients authorized for use by the Commission.

The Commission evaluates every active substance for safety before it reaches the market in a product. Substances must be proven safe for people's health, including their residues in food and effects on animal health and the environment. The procedure for approval is described at https://ec.europa.eu/food/plant/pesticides/approval_active_substances_en. The status of registration of pesticides in the EU as per Regulation (EC) No 1107/2009 of the European Parliament and of the Council

of 21 October 2009 concerning the placing of plant protection products on the market and repealing Council Directives 79/117/EEC and 91/414/EEC is available at <http://ec.europa.eu/food/plant/pesticides/eu-pesticides-database/public/?event=activesubstance.selection&language=EN>

Global GAP²

Global GAP which began as EurepGAP in 1997, as a private sector initiative by retailers belonging to the Euro-Retailer Producer Working Group, have set voluntary standards for the certification of agricultural products around the globe. It was a reaction to growing concerns by consumers about product safety, and environmental and labor standards. It is a partnership with agricultural producers and retailers who want to establish certification standards and procedures for Good Agricultural Practices (GAP). Local inspectors and auditors are certified to implement these standards in Kosovo. Farmers or farmer groups can only be certified against the Global GAP criteria by authorized Certification Bodies, which are listed on the web: http://www.globalgap.org/uk_en/what-we-do/the-gg-system/certification/Approved-CBs/index.html

FAO/WHO Codex Alimentarius³

The *Codex Alimentarius* is a collection of international food safety standards that have been adopted by the *Codex Alimentarius* Commission (the 'Codex'). The Codex is funded jointly by the FAO and WHO, which in the early 1960s, recognized the importance of developing international standards to protect public health and minimize disruption of international food trade. The Codex Alimentarius, or the food code, has become the global reference point for consumers, food producers and processors, national food control agencies and the international food trade. The code has had an enormous impact on the thinking of food producers and processors as well as on the awareness of the end users – the consumers.

3. Municipal Environmental Permit

Projects and activities that are subject to Municipal Environmental Permits (MEP) are listed in the Annex of the Administrative Instruction No. 01/2017 (see the list below, which is the update of the Annex 7 of ESMF) as well as the projects and activities that have passed the selection phase in MESP and are assessed to be subject to Municipal Environmental Permit and not EIA.

To obtain a Municipal Environmental Permit, that is a condition for obtaining construction permit and development of specific activities, the applicant shall submit a request to the Municipality to which is attached the Report on MEP. The MEP will be issued after review and approval of the Report.

The Report on MEP contains:

- Description of the project;
- Description of the technology process, updated equipment;
- Identification and description of environmental impacts;
- Description of measures to reduce negative impacts on the environment;
- Investment values of the project;
- Measures for the rehabilitation of the surface after completion of the activity

The Report can be drafted by a natural or legal person, which together with the applicant of MEP Report is responsible for the accuracy of data contained in the Report.

The Administrative Instruction for the release of MEP is in force since 2017, so the existing subjects, that do not have MEP, are obliged to be equipped with MEP.

List of the activities that require a Municipal Environmental Permit according to the 'Administrative Instruction (MESP)-No.01/2017 for the Release of Municipal Environmental Permit'

1. *Auto-services;*
2. *Car-washes;*
3. *Auto services with vehicles out of use up to 20 pieces;*
4. *Outlets of the gas (LNG) to 5m³;*
5. *Petrol station with capacity up to 50m³;*
6. *Saw for wood material;*
7. *Factory for wood processing, joinery, etc. up to 1000 m³/year;*
8. *Furnaces for production of bread and other flour products;*
9. *Sewage wastewater network and their rehabilitation with the length to 5km;*
10. *Construction and rehabilitation of existing water supplies in length up to 5km;*
11. *Reconstruction of existing roads and construction of new road axes (length up to 5km);*
12. *Butcheries;*
13. *Production of lime;*
14. *Production of concrete and prefabricated elements, tiles etc. with capacity designed to 2m³ concrete/hour*
15. *Storage of construction and demolition waste for the Municipalities that have less than 60.000 inhabitants.*
16. *Growth of fish in artificial ponds, surface to 300m²;*
17. *Swimming pools, without hotel facilities and auxiliary buildings;*
18. *Marble processing workshops;*
19. *Construction of collective housing building and services, (catering, trade, commercial, business, etc.) with the surface based on 450m² or total area of the building over 1500m².*
20. *The activity of compost, with total amount up to 100m³ or 40 tons/year;*
21. *Warehouse for fertilizers and pesticides;*

22. *Food service facilities (kebab, confectionery, popular kitchen, restaurants, etc.).*
23. *Places or centers for the collection and accumulation of waste, which is stored solid waste (plastic, paper and glass) in quantities up to 30t;*
24. *Installations for the intensive rearing of poultry, swine, cattle and large flocks that have less than: 5000 bird or poultry; 250 pigs, 50 cattle, 500 small livestock's;*
25. *Installation of wind power for energy production, up to 100kW/h;*
26. *Solar power system and Photovoltaic systems for energy /steam production, up to 100kW/h;*
27. *Stations for mobile telephone;*
28. *Places of the livestock in open and closed places;*
29. *Storage and trading points of building materials.*
30. *Craft centers;*
31. *Services (servicing of technical and electronic equipment);*
32. *Photographic studios;*
33. *Manufacture of plastic doors and windows.*

Environmental Authorization

The competent authority for application of procedures for issuing this authorization is MESP.

Environmental Authorization is required for:

- Temporary proposed activities and projects, which may cause environmental impacts.
- Temporary proposed projects that are not subject of Environmental Municipal Permit and Environmental Consent (e.g., transport of hazardous materials).

To obtain an Environmental Authorization the applicant must submit an Application to the MESP attaching an Environmental Report. This Report, which shall be drafted by the applicant, contains:

- Description of the project or activity,
- Description of the equipment and process of project or activities,
- Identification and description of environmental impacts.
